# NAKIVO Backup for Microsoft 365

Microsoft 365 data is not protected just because it's in the cloud. Microsoft is only responsible for infrastructure upkeep and application availability. Data protection is your responsibility. NAKIVO delivers incremental onsite backup and point-in-time recovery capabilities for Microsoft 365 data. With backups stored on-premises, you are in control of your organization's cloud data and can ensure that it is accessible and recoverable when needed.

## BENEFITS

**2X**
faster with incremental change tracking

**49%**
lower TCO than other vendors

**4.8 STARS**
average rating for saving time and money

**1 INSTANCE**
to protect thousands of Microsoft 365 users

**25+**
Microsoft 365 items protected

**24/7**
Ransomware protection with local backups, RBAC, and multiple backup copies

**5 MINUTES**
for solution deployment and setup

## Key capabilities – Simple backup and recovery across Microsoft 365 apps

**Fast backup**
Incremental backups with native change tracking for more efficient data protection workflows.

**Complete protection**
Back up data residing in Exchange Online, SharePoint Online, OneDrive for Business and Microsoft Teams to your local datacenter.

**Instant recovery**
Recover entire backups or specific Microsoft 365 items to the original or a different account – emails, attachments, contacts, folders, files, In-place archive mailboxes, In-place and litigation hold items, sites, document libraries, channels, posts and more.

**Advanced search**
Whatever the scenario, easily locate and retrieve data from local backups for regulatory compliance, internal audits and e-discovery requests.

**Scalable and flexible**
Protect thousands of Microsoft 365 users with a single deployment of the software with a per-user subscription model.
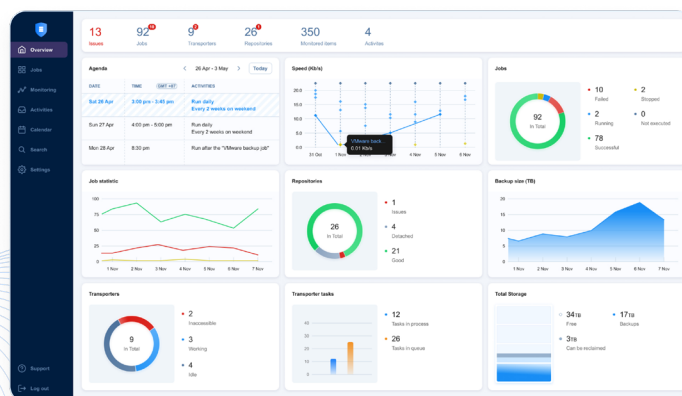

**Affordable**
Affordable data protection for Microsoft 365 starting at $0.80 per user/month for a 3-year subscription.

**Simple administration**
NAKIVO provides an integrated solution for physical, virtual, cloud and SaaS workloads with a single web interface for all your data protection activities.

**24/7 support**
Our highly-rated technical support team is available around the clock to ensure that you get the most out of our solution.

## Why you need NAKIVO Backup for Microsoft 365

### Accidental deletion
Accidental data deletions are the leading cause of data loss in the cloud. They are costly yet easily preventable.

### Cybersecurity threats
Cloud data and especially collaborative platforms in the cloud are a lucrative target for ransomware attackers and are vulnerable to other cyberthreats. You don't have to give in to their demands.

### Retention policy gaps
Data continuously changes across Microsoft 365 services and storage platforms. Native versioning is not enough to protect your data.

### Regulatory and legal compliance
Organizations can face legal penalties if they fail to submit data to regulatory or judicial bodies in a timely manner.

### Complex data architecture
Microsoft Teams data is stored across different apps, including Exchange Online, OneDrive and SharePoint Online. Using native retention options is complicated and error-prone.

## Microsoft 365 Data Protection Is Your Responsibility.

### Ensure operational continuity
Operational disruptions arise from data loss and unavailability. With reliable, accessible backups, you can restore your data within hours or even minutes and achieve seamless workflows.

### Store data on-premises
Onsite storage of backup data provides quick recovery, added security and total control over data even after malware incidents.

### Simplified data retention
With a dedicated backup solution, easily set up retention and recovery point rotation for Microsoft 365 data wherever it resides, even when data is stored across different services.

### Create point-in-time copies
With proper settings for cloud data, you can avoid retention gaps and use the backups for point-in-time restores, overcoming the limitations of native versioning.

### Retain data for compliance
Keep your organization safe from penalties and litigation by maintaining well-documented backups. Easily access data for any point in time to achieve better compliance.

**2022 Gartner© Magic Quadrant™**
Honorable Mention in Enterprise Backup and Recovery Solutions Category

> We've been backing up **2,500 Microsoft 365 user accounts** for over 2 years. We appreciate the enterprise feature set that enables us to protect and recover Microsoft 365 and our on-prem VMware environment from a single pane of glass.
>
> Robin Damen, CEO at Virtual Computing

> We chose NAKIVO for Microsoft 365 to back up our 110 mailboxes. The possibility to recover entire mailboxes, selected files, and folders in case of deletion is the main advantage.
